Suite 600, 400 Penn Center Boulevard
Pittsburgh, PA 15235

Dear Mr. Selker,

Your inquiry for information on Ethyl 8237 polyvinyl chloride was forwarded to me for an answer. This is the material that Pennex uses to blow mold.

We control the residual VCM in this material to <0.06 ppm. I have also enclosed the Material Safety Data Sheet that covers this material.

If you have any additional questions, I may be reached at (504) 389-7636.

Very truly yours,

ETHYL CORPORATION
