

ETHYL GASOLINE CORPORATION

25 BROADWAY

INTER-OFFICE
CORRESPONDENCE

NEW YORK March 8, 1929.

Dr. R. A. Kehoe,
College of Medicine,
Eden & Bethesda Avenues,
Cincinnati, Ohio.

Dear Dr. Kehoe:

Some time ago I wrote you regarding the case of [REDACTED] at Abilene who thought he might have lead poisoning.

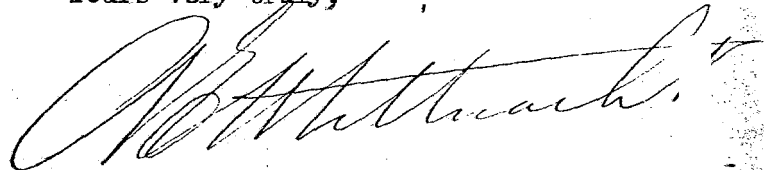

In Ronan's report he stated that the doctors did not think Ethyl Gasoline had anything to do with the case.

However, under date of March 3rd, Ronan writes as follows:

"On Friday, Mr. J. G. Davis, Asst. Div. Mgr. of the Continental Oil Co. at Wichita Falls, Texas, called me and stated that Mr. [REDACTED] had attempted service of complaint on the Continental Oil Co. but that Mr. Jeffries, the local representative, had caused him to delay the service; he also said that the doctors handling the case appeared to have reversed their attitude and now believe that the men have been poisoned by the gasoline."

I have discussed this with Mr. Webb and he thinks it advisable for you to have one of your doctors go to Texas and examine this man, sending us a full report on his condition.

Yours very truly,

C:G
