Aihe: Request for meeting with Arkema re consequences of the proposed PFAS REACH
Restriction on key European value chains

Seurantamerkintä: Seuranta
Merkinnän tila: Merkitty

Dear Mr. Karkkainen,

I am contacting you on behalf of our client Arkema to ask for a meeting this winter, tentatively as of March 2024.

Our client would like to bring to your attention important data and contextual information on the Kynar® PVDF uses, a fluoropolymer, explain the status on emissions across the polymer life cycle, emission reduction measures, and end-of-life management for fluoropolymers (including recycling and incineration). Kynar® PVDF is a durable advanced material and a critical component in batteries, semiconductors, vaccines manufacturing, medical devices, water treatment and ultra durable architectural coatings just to name a few.

Arkema is a pioneer in the substitution of fluorosurfactants. The company is completing its transition to 100% production without fluorosurfactants in the next months at the Pierre-Bénite site in France.

Arkema submitted data to the ECHA public consultation, including a rigorous evaluation of the emissions associated with Kynar® PVDF through its life cycle, end of life solutions, together with a comprehensive assessment of the alternatives and a socio-economic assessment.

- PFAS Submission ID numbers: 4424, 6918, 6920, 7140
- PFAS Submission table numbers: 17, 52, 52, 57

We would welcome the opportunity to exchange on this critically important file with you given the unprecedented volume of information submitted during the public consultation and the potential unintended consequences linked with a broad ban of fluoropolymers.

I look forward to hearing back from you, and do not hesitate to get in touch with any question you may have.

Best regards,

Marence

On behalf of

ARKEMA

Marence Jurgens (she/her)
