October 29 New Yorker
Article

R. E. Widing

The following information is supplied to reveal our programs in the ICD as it pertains to asbestos.

Barberton

Annual physical examinations are performed on all workers handling asbestos. This includes chest X-ray and vital capacity. Vital capacity measurements have been made since 1972. No blood chemistry.

Insulators (pipe coverers) are included in this examination. No increase in pulmonary markings or cancer.

Natrium

Annual physical examinations are performed on all workers handling asbestos including insulators. X-rays are performed annually. Vital capacity measurements have been made since 1972. Complete blood chemistry is included and a urinalysis but these are for determining lead absorption rather than asbestos. This started recently and has been negative. No significant medical findings. The chest X-rays are performed at the county medical hospital and are read by one of three radiologists at the hospital. Since the type of exposures are not related to the radiologist, it has been recommended that they be so informed in the future and also review past X-ray films for assurance.

Lake Charles

Annual physical examinations composed of chest X-rays (full size) are made. Vital capacity measurements have been initiated since publication of the asbestos standard. There have been no pulmonary markings suggesting asbestosis or cancer among those handling asbestos. No blood or urinalysis are performed.

Insulators have physical examinations annually, chest X-ray and vital capacity measurements.

November 1, 1973

Corpus Christi

Physicals every 18 months in the past included chest X-rays. Vital capacity measurements have been made for the past four years. Profile 1--United Medical Laboratory, Inc. tests (see attached). Insulators are included in the same program. X-rays are made at the plant. Dr. Craig reads these films. If anything is found, he refers the X-ray to a local radiologist. Four years ago one person had benign lung tumor surgery which was considered non-occupational. The man returned to work in the same operation later. We should consider whether this individual should work with asbestos.

A program to advise the workers of the hazards of working with asbestos has been completed by most plants, however, I am asking them to intensify and make a record that the employees exposed to asbestos are fully informed of the potential hazards.

Zeb G. Bell, Jr.

FORMER PPG PLANT SUPERINTENDENT
DIES SUDDENLY IN BEAUMONT

D. L. DUNCAN

Dewey L. Duncan, 56, Manager of Manufacturing, Houston Chemical Company, died suddenly today (March 24) at his home in Beaumont, Texas. A long-time employee of PPG Industries, Duncan served at the Lake Charles plant from 1947 to 1954 and again from 1959 to 1974, when he was promoted to the PPG Industries subsidiary in Beaumont. His assignments at Lake Charles included Shift Supervisor, Production Superintendent, Operations Engineer, and Plant Superintendent, the job he held at the time of his transfer to Beaumont.

Duncan joined PPG Industries at their Corpus Christi, Texas plant in 1946 following his graduation from Texas A & M University in 1942 and a tour of military service in the U. S. Army Air Corps, 1942-45. He was a native of Copperas Cove, Texas.

While in Lake Charles, Duncan was active in many civic organizations including The South Lake Charles Rotary Club, Lake Charles Chamber of Commerce, Lake Charles Chamber of Commerce, Calcasieu Area Council Boy Scouts, American Petroleum Institute, American Institute of Chemical Engineers and Texas A & M Former Students' Association. He was a member of St. John's Lutheran Church in Lake Charles.

Funeral arrangements will be announced by Broussard's Mortuary, 2000 McFaddin Street in Beaumont.

BB 0014027

He is survived by his wife, Gladys; one daughter, Debra, and two sons, James and David.
