

S-W PAINTER MAINTENANCE PRODUCTS
MEETING GOVERNMENT SPECIFICATIONS

-IMPORTANT-

Pages 1 & 2 cover those S-W assignments meeting Government Specifications for Maintenance Painting.

Page 3 lists suggested alternates to be used when necessary. Whenever quotation is made on these items, the following statement must be clearly emphasized:

"The Sherwin-Williams Company does not claim that their products listed (on pages 2 and 3) will meet applicable specifications, but do hereby certify that those paints listed will give performance equal to or better than specified materials."

SUBJECT: P.M.I. SALES PRODUCTS - CHANGES

To eliminate confusion in the minds of the PV&L Formulators who are making assignments on Painter Maintenance regulars and specials, it would seem well that the name "Paintercraft" be deleted from the Indices B71 through B87.

The heading should be changed to read as follows:-

B - PAINTER-MAINTENANCE SALES PRODUCTS (Including Paintercraft and Painter Maintenance Specials)

B71	P-M, Primers & Sealers,	P
B72	P-M, Tinting Colors and Pastes	P
B73	P-M, Varnishes	V
B74	P-M, Dry Wall Products, Texture, Filling & Joint Compounds	P
B75	P-M, Color Harmony	P
B77	P-M, Patterned Effects, Polychromatic Finishes, Opal Glo, Multicolor, etc.	P
B78	P-M, Wall Finishes, Int. & Ext.	P
B79	P-M, Quali-Kote, and Emulsion Specials	P
B82	P-M, Maintenance Wall Enamels,	P
B87	P-M, Fire Retardant	P

Confusion has occurred because the laboratory Formulators have been guided by the names contained in the Indices, rather than adhering rigidly to the Sales Departments' classification of the customer. In other words, the Formulators have not asked the Supervisor if this account belonged to "Painter Maintenance," "Product Finish" or "Industrial Maintenance," and in some cases, the Supervisor may not have recognized the importance of this identification.
