Objet : Question - response (WP4)

Dear 5.1.2e [redacted]

In response to your question regarding the definition of micro powders in the mail below one could use information from the PFOA dossier (for at least PTFE micro powders)

PTFE micro powders are finely divided low molar mass (104-106 g/mol) PTFE fragments with small particle sizes (1-20 µm) to average size of 50 µm.

See i.e.:

[Revised restriction opinion template version 11/2015 v4 comments from ENV GROW RL SD SK SG \(europa.eu\)](#)

I hope this helps.

Best regards,

5.1.2e [redacted]

Betreff: TR: PFAS Restriction – 2nd Stakeholder consultation launched on 19 July - Question

Dear 5.1.2e [redacted],

Regarding the following question on page 84 of the consultation, is there a definition somewhere of „micropowders“? I could not find it even in the supplementary document.

*If available, please provide data on the tonnages used (yearly EEA) and applications of PTFE and PVDF micropowders.*

Thanks for your help,

5.1.2e [redacted]
