EMPLOYEE RELATIONS DEPARTMENT

August 1, 1966

TO: G. J. STOPPS, M.D., D.O.
CHIEF, PHYSIOLOGY SECTION
HASKELL LABORATORY

FROM: C. A. D'ALONZO, M.D.
MEDICAL DIRECTOR

I have your memo of July 28. I also have received your masterful summary which is very thorough; and I am in total agreement on all the points mentioned.

I do believe that we will have to know about what, if any, problems we have with asbestos in the Du Pont Company before we plan any expensive research. I am hopeful that my memo to all physicians will give us some needed information on this point.

I am very happy that you are moving along with Dr. Nadel on the pulmonary program. I will stress that this will need to be simple, expedient, and accurate for I feel that long delayed testing will fail by the wayside.

I am looking to Charlie and you to do whatever is necessary to institute it, keeping me apprised as to progress. Charlie and I talked about any help we may get from Ohio State where this has been done in skilled hands. I am sure a visit with you and Charlie here would be profitable, if you agree.

I share with you encouragement concerning joint studies between the Haskell Laboratory, Sidney Pell's group, and the plants; and I can foresee no reason where this should not be initiated in the very beginning.

Keep me posted and many thanks.
