Mr. W. A. Kuhn

General Offices

These photos, taken Thursday June 20, 1968, show progress made to date.

Photo 1 looks south with the warehouse office on the right, the warehouse skeleton on the left. Compared with photo taken 6-6-68, major differences are completion of office exterior trim and erection of warehouse skeleton.

Photo 2 looks northwest. Although difficult to see, there is some piping installed in the tank farm that was not there in the last picture.

Photo 3 shows the dramatic change with erection of the warehouse skeleton underway.

Photo looks southeast, giving a good view of the truck loading area and the warehouse skeleton.
