

JUN 24 1976

FROM S. T. Howell

DATE June 22, 1976

FOR Mr. W. M. Tomc

CITY Strongsville, DPJRC

cc: Mr. J. E. Southwick

ANSWERING

LETTER OF

Mr. E. D. Hood

Mr. T. W. Batt

SUBJECT LEAD IN PAINT

Current law still permits 0.5% lead in the dried paint film. The U. S. Senate has already passed a bill which will permit a reduction down to 0.06% unless the CPSC rules that some other lead level is permissible (between 0.06% and 0.5%). If the CPSC does not act on this within the next 6 months, chances are that Congress will reduce permissible lead level to 0.06% by July, 1977.

I doubt very much that the CPSC will act to state that an intermediate level of lead is safe and acceptable.
