MARCOR

Mechanical Asbestos Removal, Inc.

Dear Client:

Re: Negative Air Filtration Systems on Asbestos Abatement Work Sites

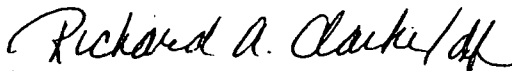

The Federal OSHA Asbestos Standard for the Construction Industry (29CFR1926.58) requires the use of the above referenced system. This procedure has been protected by U.S. Patent #4,604,111 effective August 5, 1986.

Upon advice of council, MARCOR has applied for and has been granted a license authorizing use of this negative air system. This license was an unexpected expense, but the simple facts are that in order to protect our clients and ourselves against blatant patent infringement we have no choice but to become an authorized user, by the patent owner.

We look upon this license issue as we would any other requirement, if it's needed to get the job done properly we have no choice in the matter but to obtain it. That's why you pay us.

Please direct any questions on this matter to Mr. Lawrence Michaels, Esquire, Fox, Rothschild, O'Brien & Frankel, 2000 Market Street, Philadelphia, Pennsylvania 19103, (215) 299-2066.

Sincerely,

Richard A. Clarke
President
