

Driers, 666, 667
 adiabatic, 667
 agitated, 666
 batch, 666
 compartment, 666
 continuous, 666
 cylinder, 666
 design, 676
 drum, 666
 festoon, 666
 high temperature, 681
 induction, 666
 intermittent, 666
 rotary, 666
 spray, 666
 tower, 666
 tunnel, 666
 vacuum, 666
 Drip, 838
 Dripping of steam pipes, 333
 Drum driers, 666
 Dry air, 838
 Dry-bulb temperature, (*see Temperature, Dry-Bulb*)
 Dry return, 838
 Drying, 645, 665, (*see also Regain*)
 adiabatic temperature, 667
 air circulation in, 671
 combustion, 673
 by conduction, 667
 constant temperature, 668
 by convection, 667
 design, 676
 direct contact, 667
 equipment for, 671
 estimating method, 683
 factors influencing, 669
 gas combustion constants for, 677
 high temperature, 670, 681
 humidity chart, 672, 673
 humidity in, 670
 industrial, 645, 665
 low temperature, 670
 mechanism of, 668
 methods of, 665
 moisture in, 669
 omissions in the cycle, 668
 by radiation, 665
 rules for, 670
 stages of moisture diffusion, 668
 constant rate period, 668
 falling rate period, 668
 sun, 665
 temperature in, 670
 time of, 671
 materials, 674
 ventilation phase, 679
 Duct, ducts,
 air, 404, 581
 design of, 581
 equal friction method, 587, 593
 velocity method, 587
 for air distribution, 565
 air velocities in, 407, 660
 circular equivalents, 589
 construction details, 598, 669
 design of duct systems, 404, 587, 596, 652, 658, 659
 heat loss from, 746
 humidity measurement in, 830
 insulation of, 735, 748
 lining factor for sound, 609
 noise transmission through, 609
 pressure loss in, 582
 elbows, 582, 660
 for recirculated air, 387
 resistance, 661
 sheet metal for, 598, 659
 sizes of, 585, 589, 653
 temperature loss in, 421
 temperature measurement in, 825
 velocity measurement in, 827
 Dust, 77, 838
 air speeds to convey, 653, 660

Dust (*continued*)
 catching devices, 86
 collectors, 661
 concentration in air, 80, 831
 counter, 831
 disposal of, 84
 industrial exhaust systems, 651
 measurement of, 831
 Dynamic equilibrium, Carrier's equation for, 2
 Dynamic head, 838
 Dysentery, 50

E

Eczema, 622
 EDR, equivalent direct radiation, 843
 Effective temperature, (*see Temperature, Effective*)
 Elbow, elbows,
 design of, 373, 404
 equivalents, 406
 loss of pressure in, 582
 resistance in, 661
 sheet metal used in, 659
 welding of, 374
 Electric, electrical,
 automatic control system, 702
 central fan heating systems, 760
 control, motor, 719
 current, as corrosion agent, 374, 380
 heat equivalent, 139, 158, 766
 heaters, 758
 conduction, 758
 gravity convection, 759
 radiant, 759
 heating, 757
 auxiliary, 765
 cost of, 766
 of hot water, 763
 industrial, 764
 heating elements, 758, 759
 with unit heaters, 759
 lamp bulbs, heat from, 158
 motors, 719
 resistors, 758
 Eliminator plates and baffles, 518
 Enthalpy, 22, 833
 Entropy, 467, 472, 839
 Equations, conversion, 848
 Equilibrium,
 dynamic, 2
 hygroscopic, 644
 Equipment noise, 604
 Equipment room, design of, 609
 Equivalent, equivalents,
 circular, 590
 direct radiation, 311, 843
 elbow, 346
 evaporation, 257, 839
 heat,
 of air infiltration, 138
 of brake horsepower, 139
 mechanical, 841
 length of run, 812
 square feet, 264
 Estimated design load, 839
 Estimated maximum load, 839
 Estimating driers, 683
 Estimating fuel consumption, 233
 Ether, 616
 Ethylene, 615
 Eupatheoscope, 833
 Evaporation, 534
 equivalent, 257
 from human body, 52, 72
 from water pans, 268
 Evaporative condensers, 477
 Evaporative cooling, 477, 489, 519
 Evaporators, 477
 Exfiltration, 119
 Exhaust systems, 651
 classification of, 651
 collectors, 661

Exhaust Systems (*continued*)
 corrosion, protection against, 663
 design procedure for, 652
 ducts for,
 construction of, 659
 design of, 658
 resistance in, 661, 662
 efficiency of, 663
 fans for, 663
 filters for, 662
 flexible, 658
 hoods for, 655
 air flow in, 656
 axial velocity formula for, 655
 chemical laboratory, 658
 large open, 657
 velocity contours in, 655
 industrial, 651
 lateral, 655
 motors for, 663
 spray booth, 658
 suction requirements, 653
 velocity requirements, 653, 660
 Expansion,
 of joints, 783
 of pipe, 361, 783
 in steam piping, 783
 tanks, 355
 Explosion hazard,
 inflammability of gases, 79
 in operating rooms, 615
 Exposure factors, 138
 Extended heating surface, 839
 Extended surface heating unit, 839

F

Fan, fans, 549
 A.S.H.V.E. test code for, 552
 attic, 460
 booster, equipment, 396
 control of, 559
 designation of, 561
 drives, arrangement of, 562
 for drying, 558
 for dust collecting, 559
 dynamic efficiency of, 551
 efficiency of, 551
 in electrical heaters, 760
 furnaces, 399
 for gas-fired furnaces, 226
 induced draft, 186
 for industrial exhaust systems, 663
 mechanical draft, 186
 mechanical efficiency of, 551
 motive power of, 561, 722
 control of, 719
 operating characteristics, 186, 551
 operating velocities, 539, 558
 performance of, 549, 557
 ratings of, 556
 selection of, 402, 556, 559, 561
 static efficiency of, 551
 system characteristics, 555
 systems of heating, 415
 tip speeds, 556
 total efficiency of, 551
 types of, 399, 549, 553, 557
 in unit conditioners, 451
 in warm air systems, 396, 402
 Fatigue, human, 54
 Fever therapy, (*see Artificial Fever*)
 Filter, filters, 539
 automatic, 541
 cloth, 662
 design, 639
 dry air, 642
 hay fever air, 622
 installation of, 543
 for sound, 402
 unit type, 539
 viscous type, 539

Firing rate, 170, 176
 Fittings, 361, (*see also Connections, Pipe*)
 areas of, 364
 boiler, 264
 copper, 371
 flanged, 372, 739
 lift, 294
 screwed, 370
 welding, 372, 376
 Flame, with oil burners, 218, 223
 Flanges, welding neck, 377, 378
 Flexible exhaust systems, 658
 Flexible materials, 607
 Floors, heat transmission through, 109
 Flue-gas analysis, 832
 Fluid, fluids,
 cooling of, 529
 formula for flow of, 581
 meters, 790
 Foodstuffs,
 regain of moisture of, 644
 temperatures and humidities for processing, 640, 674
 Force, 839
 Forced-air heating system, design, 899
 Formulae,
 conversion, 848
 heat transmission, 89
 Freezing,
 of cooling water, 535
 insulation against, 749
 Friction,
 of air, in pipes, 584, 585
 in chimneys, 191
 coefficients, 585
 heads in pipes, 342
 losses in ducts, 583, 585, 589
 in water pipes, 807
 Fuel, fuels, 163, (*see also Anthracite, Coal, Coke, Gas, Lignite, Oil*)
 bed, draft loss through, 195
 burning equipment, automatic, 207
 burning rate charts, 234, 235
 consumption, 233, 241
 oil gages, 225
 oil, heating value, 180, 678
 oil specifications, 180
 requirements,
 of buildings, 235
 degree-day method, 239
 utilization of, 233
 Fumes, 77, 839
 industrial exhaust systems, 651
 toxicity of, 81
 Fundamentals of heating and air conditioning, 1
 Furnace, furnaces, 839
 capacity, 389
 design of, 216, 252, 383, 400, 405
 gas-fired, 226
 performance curves of, 391
 types of, 226, 399, 409
 volume, 839
 for warm air systems, 399
 Furnacestat, 404

G

Gage, gages,
 draft, 824
 fuel oil, 225
 pressure, 839
 steam, 264
 vacuum, 824
 Galvanometer, 825
 Garage, garages,
 air flow necessary in, 692
 heaters, for, 228
 Gas, gases,
 burner control, 714
 burning rate chart, 237
 calorific value, 139, 182
 combustion constants, 677
 constant for dry air, 8
