

Cement Asbestos Products Company

Ragland, Alabama

/FROM: W. H. Beasley

July 10, 1972

TO: H. U. Gilmer

SUBJECT: 2nd Quarter 1972 Pollution Report

1. Areas of concern are: In-plant dust, disposal of collected dust and scrap, settling of run-off process water and disposal of settlings.

2. We have ordered our own dust sampling devices for in-plant environmental control and will be conducting semi-annual tests. We are making some progress on better control of run-off water.

3. Alabama Air Pollution Control Commission is making an inspection of our facilities July 11, 1972. I will furnish you results of the inspection.

4. Present equipment is working well.
