Sharon indicated that Cleveland confirmed asbestos labels were attached to JA shipments. I have an example of the label for your review. Sharon indicated that Cleveland is sending an example to her, I am having Glenn send us an updated copy too.

Priority: High

We received an inquiry from Chrysler regarding JA rear brake asbestos linings being produced at Cleveland, sent to Varga for assembly on brakes, then to Precision Modular Assembly/Monroe for wheel sub-assembly, with final shipment to Chrysler. The Precision people were concerned about asbestos exposure in their plant from brakes shipped from Varga. The Precision people have been provided with exposure monitoring data for similar assembly operations at Kelsey-Hayes, which showed minimum exposure. They seemed satisfied with that information, but an issue was raised regarding asbestos warning labels on shipping containers. Can you check with Cleveland as to what type of labeling is included on our product shipments and followup with Sharon (313-362-7057) on Monday with that info and any other issues? We need to be sure we are in compliance.
