NON-ASBESTOS VINYL JOINT COMPOUNDS

November 1, 1974

cc: Mr. T. W. Richards - Tigard
Mr. T. R. Godfrey - Portland
Mr. D. C. Corkill - Portland

This will confirm our conversation concerning the initial manufacture of non-asbestos vinyl joint compounds at Chicago. At our request, it has been arranged to begin manufacture of non-asbestos vinyls the week of November 11 with Bill Gattel on hand to assist you in being sure we get started right. We will be making some slight modifications in the formula to overcome the reports of short working that we have had from Drywall Associates. In addition, Bill will want to make one batch of a non-asbestos formula for hand application which will probably be tried in Detroit or Milwaukee.

We want to be sure you have a complete clean-out of the system before we begin the non-asbestos vinyl, and Bill Gattel will be in touch with you next week regarding this.
