June 8, 1951

Dr. Arthur J. Vorwald, Director
The Saranac Laboratory
Saranac Lake, New York

Dear Art:

On June 26 I expect to be back at our Sayreville, New Jersey plant (Kaylo Division) to discuss with Mr. Pfeifer how to further improve dust conditions there.

It would be helpful if we had the results of the tests made by Tom Durkan and Ed Urban at Sayreville some time ago, as well as any recommendations they might have after they saw the plant firsthand. Tom phoned me some preliminary findings a few weeks ago, but—are there any further results available now?

Incidentally, I may be driving through Saranac next Tuesday, June 12, enroute to our plant at North Troy, Vermont. If we do go through, and if it's at a reasonable time of day, I'll give you a ring.

Personal regards.

Sincerely yours,

Bill
