ELIMINATION OF SALES
ASBESTOS CEMENT BOARD COMPONENTS

Marleyans:

Effective March 1, 1986, Engineering Change Notice #6424 has been issued advising that as of that date orders for ACB panels, pieces, or components of ACB will not be accepted by Marley Cooling Tower Company.

If it is impractical for us to provide a substitute material or if owners insist on ACB components, you may instruct them to deal directly with either one of the following vendors:

Atlas Turner, Inc.
5600 Hochelaga-Montreal
Quebec-IIN 1W1-Canada

Cement Board Fabricators
442 Downes Terrace
Louisville, KY 40214

Whenever possible, GRP panels of 25 or 50 flame spread or plywood will be used as substitutes for corrugated ACB. Flexboard II is a non-asbestos cement board and is an acceptable substitute for flat ACB. Flexboard II is not available in corrugated form.

Elimination of the sale of ACB components is predicated on our inability to insure potential liabilities for Marley Cooling Tower Company as a member of the chain of supply of such components to final users. Please advise if there are any questions.

Very truly yours,

A. R. Thompson
