FROM: Bob Martin

SUBJECT: Asbestos and Health

I have received from Purchasing a requested write-up by our supplier on the proper handling of asbestos materials. I would appreciate your reviewing this and then discussing with me recommendations regarding the control of asbestos in unloading at the boxcar and utilization in the formulation room and the mix room. Are we properly safeguarding our personnel in all these areas? Do we have the proper warning signs available in the work areas and storage areas?

You and your personnel's expertise should be quite helpful. Thank you for your assistance in this matter.
