Mr. D. Wood
BRUSSELS

The information in my telex dated June 19, 1968 is correct. I am enclosing a copy of the report from Younger Laboratories on which this is based. I don't know what the source is for the information you have but, certainly, this should be corrected.

Work has been done on the Aroclors not only by the oral route, but also by skin and inhalation as well and it may be that the data have gotten mixed up somehow.

M. N. Johnson, M. D.
