Alleged Poisoning

December 13, 1944

In case it has escaped your attention, I am attaching the front page of the December 5 issue of "Dealer News", as a small squib indicates an alleged Fluid poisoning. It reads:

"ETHYL GAS FATAL
TO TRUCK DRIVER

"Because he was unable to read the label "Ethyl Gasoline" on a bottle of fluid, Sam [REDACTED] 45, 3800 E. Olympic Blvd., a truck driver, died in the General Hospital.

"Police reported that the man drank the liquid, apparently, believing it was alcohol."

There is probably nothing to it, but we might have a report for our records. If anything appears significant, kindly send a copy of your report to Dr. Kehoe.

Yours very truly,

O. B. Lewis
