FROM: Jerome F. Cole

SUBJECT: Seminar on Resource Conservation and Recovery Act (RCRA)
Thursday, 31 July, 1980, The University Club, Washington, D.C. 10:00 AM

The Resource Conservation and Recovery Act (RCRA) is potentially one of the most costly and certainly one of the most complex of the recent environmental regulations. Its impact will be felt throughout industry and could be especially costly to the metals industry. Basically, RCRA establishes a "cradle-to-grave" methodology for the handling and disposition of industrial wastes. The detailed requirements were announced in the May 19, 1980 issue of the Federal Register. However, many of these requirements are somewhat vague and will be subject to interpretation. LIA/ZI/CC members are urged to attend this Seminar in order to learn more of the requirements of RCRA and to identify problem areas in need of further information. We will have presentations from industry personnel, legal counsel and EPA personnel. A panel made up of industry experts on RCRA will attempt to answer questions about how the metals industry can cope with the new regulations. A copy of the Agenda is enclosed for your information. Certainly, nearly every company will be impacted by RCRA. Therefore, we would urge your attendance.

Please notify at once Ms. Ingrid Olson at the above telephone number to indicate whether or not you will be in attendance. A \$15.00 charge to offset the cost of lunch will be collected at the door.

Sincerely,

Jerome F. Cole
Director, Environmental Health

Seminar on Resource Conservation and Recovery Act (RCRA)
The University Club
Washington, D.C.
Thursday, July 31, 1980
10:00 AM

Introduction of Resource Conservation and Recovery Act (RCRA)

- Background and History of Legislation - J.F. Cole, Director,
Environmental Health,
LIA/ZI/CC
- Outline of RCRA Requirements - D.R. Lynam, Assistant Director,
Environmental Health,
LIA/ZI/CC

Specific Requirements for RCRA

- EPA Representative and E.H. Seeger, Prather, Seeger, Doolittle and Farmer

Panel on RCRA

- Question and Answers from Speakers and Panelists from Industry
