Our next SHAC meeting will be held Tuesday, June 8th in the Emergency Conference Room at 10:00 AM.

I have had some thoughts about how we as a committee can increase our day-to-day involvement in plant safety efforts and programs and these points have come to mind:

1. Should we design a decal or some other method of hard hat identification (possibly the plastic letters "SHAC") identifying us as committee members when we are out in the plant?
2. Should we designate members as "Principal SHAC Contact" for particular geographic locations and crafts/groups? This would give all committee members first-hand exposure in many cases to potential items for our attention. Several details would need to be worked out (including publicity) prior to implementation. One possible grouping might include:

Stacy - Manufacturing Areas
 Lacy

Hebert - Maintenance Areas

Tissue - Services, Office Areas

Cavender - Research, PT, Lab Areas

I'd appreciate your input regarding these suggestions plus any ideas that you might have. We'll plan to discuss this at our June 8th meeting.
