

CORPORATE COMMUNICATIONS DEPARTMENT 270 PARK AVENUE, NEW YORK, N. Y. 10017
Union Carbide Corporation

MEMORANDUM

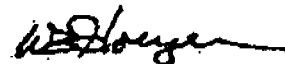

September 3, 1981

CONFIDENTIAL

TO: T. A. Lincoln, M.D.

I am attaching for consideration suggested changes to your proposed letter to Texas City employees, re the epidemiology study. As did other members present at our August 28 meeting, I found your draft to be quite well done and want to offer my compliments.

My suggested changes reflect an effort to tighten the message and organize the letter in a more formal, report format for employees which we will need for outside audiences as well. I recommend consideration of this approach inasmuch as our letter will become a public document, available for reference, reproduction and interpretation by interested media, local officials and government agencies. Thus, I have made an effort to write for all audiences without compromising the most important goal of helping our employees understand the complex nature of these studies.
