one-half chrysotile.

Assuming those facts to be true, Doctor, do you have an opinion, to a reasonable degree of medical certainty, as to which, if any, exposures to Owens-Corning Fiberglas Kaylo pipecovering and block were substantial contributing factors to the development of Mr. Vandergucht's peritoneal malignant mesothelioma?

A Yes, sir, and, again, for the same reasons. It is my opinion that all of those exposures contributed to the development of this cancer.

Q And the basis for that opinion would be as you previously expressed?

A As I previously expressed.

Q Doctor, you have in the past reviewed cases for me concerning asbestos-related disease?

A Yes, sir.

Q And you have reviewed cases for our office?

A Yes, sir.

Q And when you review those cases, do you charge a fee, Dr. Gabrielson?

A Yes, sir.
