DOC#: CSR161

DOCUMENT DESCRIPTION: Notes Compiled During Recent Inspections in the Northern Fields - Extract from Mines File

(22)

EXTRACT FROM MINES FILE NO. 31/53.

CUE, 28th October, 1

The State Mining Engineer,
PERTH ..... W.A.

The following are notes compiled during recent inspections in the Northern Fields.

(sgd) J. Boyland
DISTRICT INSPECTOR OF MINES

AUSTRALIAN BLUE ASBESTOS. - Wittenoom.

Production is increasing and approximately 90% of the ore now comes from the new portal workings.

Conditions underground are good but continual alterations and additions to the milling sections necessitate the removal of various sections of the mill walls and the dust menace was again prevalent. New treatment plant construction is well under way and the plant will again be totally enclosed. The dust will again be under full control.

Work is now being carried out to mine in Colonial Gorge.
