Subject: EPA NSPS for GHG for New Coal Plants-Comment Deadline and Public Hearing

**EPA NSPS for GHG for New Coal Plants -
Comment Deadline and January 8 Public Hearing
in Washington, DC**

Dear Mandy,

The U.S. Environmental Protection Agency (EPA) is seeking comment on its recently announced **NSPS for Greenhouse Gas Emissions from New, Modified, and Reconstructed Electric Generating Units** which would replace the prior administration's regulation for greenhouse gas emissions applying to new, modified, and reconstructed coal power plants.

The newly-proposed regulation sets a CO₂ emissions standard of 1,900 lbs/MWh for sources with heat input >2000 MMBtu/h. The prior regulation was 1,400 lbs/MWh and required partial carbon capture and storage to achieve.

The deadline for submitting comments on the proposed regulation is February 19, 2019. Comments should be identified by Docket number **EPA-HQ-OAR-2013-0495** and submitted online at <https://www.regulations.gov/>.

Additionally, EPA announced today it will hold a public hearing on this proposal on **January 8, 2019 in Washington DC**. Details on the hearing are available [here](#). The last day for pre-registration for the hearing is **January, 2, 2019**. The American Coal Council will speak at this hearing.

American Coal Council members with suggestions for content and technical details for us to include in our comments in this proceeding are encouraged to contact me at bmonseu@americancoalconcil.org or 202.756.4540.

Regards,
Betsy Monseu, CEO
