2. J. King	-	San Jose
3. A. Smith	-	San Jose
4. C. Brown	-	Fitchburg
5. T. Jones	-	Waltham City
6. J. Johnson	-	Waltham
7. J. Day	-	Waltham

NOTED
8.

~~CONFIDENTIAL~~

There is a reprint of an article entitled "Experimental Studies of Inhibition," which appeared in the January, 1934, (Vol. 3), issue of the A. M. A. Archives of Industrial Hygiene and Occupational Medicine. These studies cover experiments with rabbits and animals over a matter of years.

I am sure this article will be of interest to you and others there in connection with the possible hazards involved in the handling of asbestos. ~~However~~ they are not too great if proper precautions are taken, which again points up the need for adequate dust control at all times.

Additional copies are not now available, but they can be obtained, and if your Fleet Manager would like a copy for his personal review, let us know and I'll send you or two along to get as soon as we can get them.
