The attached letter from Dr. A. Pozefsky indicates that within a month we should be ready to submit the guides to the various government agencies.

The document, especially with the analytical procedures attached is quite lengthy and I have not reproduced it. However, a copy of the table of contents is attached.

Accordingly my purpose in writing was merely to inform as a progress report, in the event that various Monsanto people would like to study the guides at this stage. Mr. Papageorge also has copy of the complete proposed guides.

P. G. Benignus
