

May 7, 1975

Talked to Paul Cooper of Capco yesterday, advising him that Africa would not have any S-80 ready for shipment until the end of August - and Africa was requesting they take S as a substitute. Paul Cooper said they would definitely need material before that time (delivery their plant would be approximately mid October if material were shipped late August) and that they would not be able to use Grade S.

We cabled London relating all this (Cable No. 566) information, and asking for shipment in June, or earlier if any tonnage available.
