

June 14, 1926.

Mr. Clinton Crane,
St. Joseph Lead Company,
250 Park Avenue,
New York City.

My dear Mr. Crane,

I have just received from Dr. Aub, and am transmitting to the Treasurer, of the University, the check for \$5,000.00 which you sent Dr. Aub for continued studies of the lead problem and the problems immediately related thereto. I want to send you my personal thanks and the thanks of the school for your great interest in this and your generosity. I feel convinced that thus far this investigation has been a really profitable one for humankind and I think for those interested in the whole problem of hygiene of the lead workers, and I trust that there will be as effective and useful results gained in these future studies.

With many thanks, I am

Sincerely yours,

David L. Edsall
Dean
