DOCUMENT DESCRIPTION: Letter to Union Carbide RE Warning Labels with Samples

012227

August 14, 1973

Mr. George Vessels
Union Carbide Corporation
P.O. Box K
King City, California

Dear George:

We'll appreciate if if you will pass this on to the right man out there. Suggested art work, in rough form, is enclosed for the next super visbestos bags. The hand printed sheet gives the wording we want to use. Also enclosed is reproducible art work for the new "Montello" lettering. The other lettering on the bag should be a neat, standard, lower case that is compatible with the special Montello style.

We'll need to find out if the bag manufacturer can extend the reverse - printed stripe across the gussets. If not, we need to know how far they can extend it.

We want the bag in a rich, dark green, printed on our regular white outer ply. In terms of construction, this would be an opportune time to incorporate a more positive sealing valve, if one is available.

We'll depend on the supplier to apply our copy in a balanced manner that is pleasing in appearance. The space between the colored stripe and the first box of copy is intentional. This will give room for the product grade, as required.

The lettering in the "5 to 1" box should be the same as in the "warning" box. We aren't trying to overcome the effect of the warning, but we do want to state our side of the case.

Please let us know if there are any questions. With bag delivery running six to ten months, an order should be booked shortly.

Best regards,

MONTELLO, INC.

Kenneth N. Campbell
