SIGNIFICANT ITEMS THIS MONTH

New record high production of 1,890,000 Lbs. exceeding the 1,860,000 Lbs. produced in March 1964. Other downtime was due primarily to chlorine supply deficiencies and interruptions. During the month a chlorine vaporizer and Brink Mist Eliminator was installed in the incoming chlorine line and will be put into operation early in May. It is expected that this will improve Hydrolysis stability.
