Dutch Boy FLAT WALL E

A smooth, hard, glare-free finish

This true alkyd resin enamel makes use of the latest scientific advance in flat enamel finish for walls. It is manufactured with **ODORLESS** and without any unpleasant odor. Its easy application properties make it suitable for use on plaster, wallboard or wood. Available in all of the modern, appealing colors of the Dutch Boy Color Gallery.

*Follow Directions—***STIR WELL—No Thinning**

Be certain the surface is clean and dry; free from oil, grease, wax, dirt or old paint. Prepare the surface by removing all loose and scaling paint, removing damaged plaster and lightly sanding glossy surfaces.

Stir well, being certain the paint is completely uniform. Cracks and holes filled with spackling compound should be coated in first. Then proceed with painting, using either brush or roller coater at the rate of about one gallon per 100 feet of wall surface.

One coat is usually sufficient, on most surfaces, to provide a permanent finish. Under unusual surface conditions or other difficulties should make it necessary to wait overnight until the first coat is dry and hard.

When more than one container of the same color is to be used, mix all before starting or while the work is in progress.

CAUTION! COMBUSTIBLE—Keep away from heat and open flame. CONTAINS LEAD. POUNDS HARMFUL IF EATEN. DO NOT APPLY ON TOYS, FURNITURE OR CHILDREN'S PLAY AREAS. MIGHT BE CHEWED BY CHILDREN. Use with adequate ventilation. Avoid prolonged contact with skin. Wash thoroughly after using and before eating or drinking.

COMPOSITION OF PAINT BY WEIGHT

PIGMENT 55.5%

Titanium Dioxide.....	40.7%
Titanium Calcium Pigment	9.9%
Calcium Carbonate.....	39.5%
Silicon Dioxide	9.9%
