Attention: Mr. Edward Rabon

Dear Mr. Rabon,

Further to your letter of the 29th September, signed by Miss J.L. Taylor, and our letter of the 3rd September, concerning samples to match Phillips No.5 asbestos.

The following samples were mailed to you on the 3rd of October for consideration by the customer involved:-

Sample Order No. S-495

5-lbs - M.653-6D ✓
5-lbs - M.562-5R

Note: A copy of the laboratory tests performed on the samples is attached.

The above grades are the best we have to offer at the moment, although neither of them is an exact match for Phillips No.5. The 6D and 5R are both somewhat shorter on the Ro-Tap sieve test; but the 5R has a slightly longer fibre distribution by wet classification than Phillips No.5. Undoubtedly the fluffy Arizona fibre is more difficult to separate by dry sieve analysis, as the fibres probably tend to be retained on larger screen sizes than our fibres. Likewise, the competitive fibre is much whiter, and has a lower magnetic rating than any fibre grades which we now produce.

A further letter will follow in a few days, covering all known outstanding customer problems, including the possibilities of a match for JM.7RF6.

Yours very truly,
ASBESTOS CORPORATION LIMITED
