Statements and opinions advanced in signed articles and advertisements are personal statements of the authors and advertisers, and do not necessarily reflect the views of the National Safety Council. National Safety News is published monthly by National Safety Council, founded 1906 by National Safety Council, founded in U.S.A. Inc. and first meeting held at Chicago, Illinois, and at additional meeting offices. Subscriptions cost \$4.00 a year, and are sent to members, schools, colleges, and libraries. For rates, changes in personnel, and other information for yearly subscription and other rates, see month. Member: Jack Burrows of Cincinnati.

THE COVER

Towers like this house temporary hoists used in high-rise construction. To be safe for carrying men, they should meet ASA standards. Many don't. See page 24.

YOU CAN'T TOP BULLARD FIBERGLASS FOR PROTECTING HEADS

Test it with heat. Molten metal. Don't worry. It withstands temperatures above 2000 degrees.

Our HARD BOILED® fiber glass safety caps and hats take much more than the 40-pound impact required in tests, without transferring the force to skull or spine. This is Controlled Shock Transmission. In thousands of tests since 1948, Bullard fiber glass has proved its superior protective qualities.

Specify the new DIHEDRAL suspension, with POWER BLOC® shock-absorbing action. It's Contour-Engineered to comfortably grip the back of the head, eliminating chinstraps.

Ask your local Bullard Distributor for Catalog HP or write...
