Dear Colleague

RESEARCH INTO ASL

I am enclosing the latest edition of the ASL Register, dated February 1987, and am writing to ask for your co-operation with some research into ASL.

While in the States recently, I visited Professor Carlo Tamburro, Professor of Medicine & Community Health; Acting Chairman, Department of Community Health; Chief, Division of Occupational Health; Director, Liver Research Centre, University of Louisville, Kentucky. We discussed VC clustering, and why some particular Plants, which have been manufacturing VCM/PVC pre-1962, have never had a case of ASL.

As a result of our discussions, we had the feeling that, for ASL to develop, certain circumstances are required, and that a co-factor may be needed.

I was wondering if you would be prepared to help in identifying such a factor?

I am enclosing a pro-forma with certain chemicals mentioned, and I should be very grateful - if you are willing - if you would tick off the years in which any of the chemicals listed was used, if in fact they were used at all, and return the form to me. I would definitely communicate back to you with any results obtained, and with what conclusions Professor Tamburro and I have made. Before, however, releasing any information with reference to any of the completed questionnaires, I will contact the individual who is responsible for that questionnaire, in order to discuss that information further, and to seek an appropriate, acceptable way forward.

It should be remembered that this exercise is purely a research topic, and therefore may yield no positive results.

I look forward to hearing from you and receiving your comments.

Yours sincerely

B BENNETT

REGISTER OF CASES OF ANGIOSARCOMA OF THE LIVER DUE TO EXPOSURE TO VINYL CHLORIDE - REVIEW DATE 1 JANUARY 1987

P R E F A C E : ACKNOWLEDGMENTS, SIGNIFICANT CHANGES, COMMENTS AND REQUESTS

1. The 10 new cases in the Register are the following: France 19, 20, 21; Germany 28, 29, 30, 31, 32; UK 13; USA 39.
2. There are amendments from the previous Register against the following cases: France 15; Germany 23, 26.
3. I would like to thank the following for informing me of new cases - Dr Contassot, Dr Barrat, Dr Landers, Dr Friedel, Dr Williams and Mr John E Ertel.
4. For the case corrections I thank Dr Contassot and Dr Friedel.
5. For other corrections and information thanks to Mr John T Barr, Mr John E Ertel, Mr R T Gottesman, Mr A King and Dr N A Sulaiman.
6. I should be very grateful if all recipients of the Register could continue to keep me fully informed of any new cases or, if they hear of other Companies who have acquired a case of ASL, it would be much appreciated if I could be notified by the appropriate person. It is very helpful if new information is supplied in tabulated form, using the headings in the Register as far as possible. For this purpose I have added a blank form at the back of the Register.
7. I would also be glad of help to keep the mailing list correct, with news of retirements and successors, etc.
8. Research: (a) I am enclosing a letter which explains a research project in which I and Professor Carlo Tamburro hope you will be able to co-operate in the interest of knowledge.
(b) I shall be very grateful if all individuals involved in research or surveys could keep me informed and if possible send me copies when they become available.
