-----------	--	---------

J & L - PITTSBURGH

. Wilcox	766 Boards in EP-5452 checked for fit. Tool is being adjusted. Require continued feedback on performance.	9/10/73
----------	---	---------

GREAT LAKES

D. Gegan	144 Ring made in EP-5453. Require feedback on fit and performance.	9/10/73
----------	--	---------

REPUBLIC-CANTON

. Smith	669 1-Pc tops now being made in EP-5452. Dry racks are being repaired. Need information on present fit of tops in castings.	9/10/73
---------	---	---------

ARMCO-MIDDLETOWN

Willis Problems encountered with EP-5453 prematurely burning during pouring.
Samples made in EP-5273D now in Mill, need report on performance.

ARMCO-ASHLAND

Willis Boards now being made in EP-5453 but we need continual check in view
of problems at Middletown.

COPPERWELD

Thebo We have problem with insufficient curing of EP-5452 boards.
Oven temperature has been increased.
Need report from Sales.

Santighian There are indications that EP-5452 made on K-4 are too small.
Before we change the tool we should check new recipe EP-5273D.

ARMCO-KANSAS CITY

Schmidt Carload will be shipped this week in regular recipe.
Holbrook We have also supplied three sets in EP-5453.
Need information on the fit.

CARPENTER STEEL

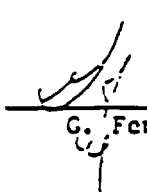

Mulhorn #75 and 357 top shipped in EP-5453.
Need feedback on casting fit and pouring.

All other accounts will be discussed during the next meeting.

N O T E:

Reminder to all Sales, to keep eye on new binder
recipes. We need continual feedback until we are sure
that all problems are solved.
