Comments:

Weather was our all consuming problem this week. We had 332 consecutive hours of below freezing temperature which is an all-time record for this area.

We suspended all production but did fire the boilers to maintain as much heat as possible in the buildings. We were on natural gas curtailment for 162 3/4 hours and had to go to our stand-by oil facilities. We will submit a detailed report.

The overflows on the "A" pipe machine vats were lowered to the centerline.

J. J. Clarkson
