 Date : December 7, 1976
 Subject : NOVEMBER SUMMARY OF VCM DOSIMETRY

Following is a summary of the VCM personnel dosimetry for the month of November, 1976. 87, eight hour TWA samples were taken of which one was above 1 ppm, with the balance less than 0.5 ppm. The overexposure (1.03 ppm) occurred when a Yard Operator was hooking up a VCM railcar during unloading operations. He was wearing an airline respirator.

<u>Range, PPM</u>	<u>Number</u>	<u>%</u>
0.0 - 0.5	86	98.9
0.5 - 1.0	0	0
1.0 - 5.0	1	1.1
5.0+	0	0.0
	<u>87</u>	<u>100.0</u>
