EXTRA FEATURES in U.S. MOTORS increase dependability

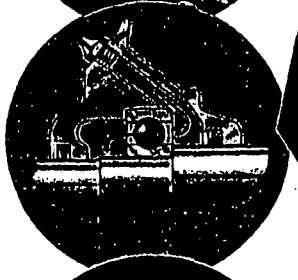

If extra long motor life interests you, look into U. S. Motors. Three major features give U. S. Motors years of extra life. (1) All windings are asbestos-protected because asbestos can never carbonize. The windings are forever safe against high temperatures. (2) Lubriflush lubrication insures bearing life for in excess of endurance of conventional types. You get life-time lubrication plus the convenience and durability of re-lubrication. (3) All castings are normalized to maintain accuracy of bearing settings.

Added features include centricast rotor, advanced styling, weatherproof design, highly hardened gears in Syncrogear types, and extra quiet operation. All add up to extreme dependability, unequalled in any other motors.

Extra life without extra cost

Attention to Detail is the Reason Why

Dust-Tight Slip Joint Connections between CONICAL Distributor and stoker hopper with drive gate to shut off the flow of coal to any individual stoker hopper section.

whatever you buy from Stock Equipment Company is of the highest quality. Take the weigh lever system illustrated above, for example. Top performance is assured because careful attention to design detail utilizes a non-welded steel assembly with steel loops. Hardened steel pivots and bearings in this lightweight unit mean low inertia and faster action with resultant greater accuracy.

No matter if it's the design of a pivot in a weigh lever system, the layout of the overall job of delivering and weighing coal between bunker and pulverizer, or the fit of a dust-tight slip joint connection (as illustrated to the left), Stock Equipment Company takes time to make sure that it is right. This attention to detail means a completely satisfactory and overall economical job for its customers.

Pride of workmanship is a common attribute of all S-E-Co. employees and is reflected in all items of their manufacture, which include the S-E-Co. Coal Valve, Soot or Sifting Valve, Automatic Coal Scale, CONICAL Non-Segregating Coal Distributor, Automatic-Under-Bunker Conveyor, and Paddle Type Coal Alarm. Next time you need such equipment, why not enjoy the advantages of having the best?

STOCK EQUIPMENT COMPANY
745-P HANNA BUILDING
CLEVELAND 15, OHIO

Specialists in Bunker to Pulverizer and Bunker to Stoker Equipment
