

**PLAINTIFF'S
EXHIBIT**

MON-31

St. Louis

May 2, 1966

CONFIDENTIAL

Mr. Homer Ryan
Trenton

The following men have been listed in our Cancer Index as having had carcinoma of the lung. The number after their name denotes the year they were reported to us. Can you check to see if any of these men were insulators, as we are interested in the connection between asbestos exposure and carcinoma of the lung. If it is not too much trouble, could you give me a work history of these various departments.

This certainly should be done discreetly, as we do not anticipate any problem and don't want to add any trouble. It is, however, important that we know whether or not there was a significant contact of these people with asbestos.
