San Francisco, California 94119

Dear Jim:

In response to your letter to Mike Pearce concerning Asbestos Free Cal-Sil products, we wish to supply the following information that was sent to our customers 1/11/73.

Our manufacturing process for Thermasil pipe insulation and Block at Valley Forge has been converted to the manufacture of an "asbestos free" product.

By February 1, 1973 we expect to have 50 to 60% of the popular sizes available in the "asbestos free" product. Therefore, on all orders scheduled for shipment after February 1st we offer the following options:-

Option 1 — On orders to ship after 2/1/73 you may specify "asbestos free" but "must be willing to wait for delivery" is that we may have a stock on some items of asbestos containing material and therefore, your order must be promised in line with our scheduled mold changes.

Option 2 — You will accept those items which are available in "asbestos free" products and the balance in asbestos containing materials.

PLEASE NOTE: Unless you specify "asbestos free" on your order, it will be handled and shipped under Option 2.

Attached are Data Sheets for our Asbestos Free products. Our 1973 Catalogue is being printed and will be forwarded when available.

Thank you for your interest.

Sincerely,

01270032

Frank E. Watson, Manager
Industrial Insulation Products
