**PLAINTIFF'S
EXHIBIT**

JM 733

Subject: PVC TEST METHODS

Attached is the proposed revision to J-M Test Method 455-10 (Quick Burst). An example of the computer tables is included.
Please review and comment on.

Please note that the plant must record both the ^{batch} temperature and that of the charge water. They will be required to use the lower temperature in determining the required hoop stress.

O.F. Noel/jm

O. F. NOEL

Attachments

*Recording the
batch temp. and
calculating the
hoop stress by
temp wont be
easy to police*
