

MINUTEMAN ASBESTOS-VAC
Operating and Filter Care Instructions

- (2) Under very light cleaning of dust created during the cleaning of brake drums and the truing of brake shoes in most medium size shops, it would be wise to change the filters once a day unless you have determined by checking, that a shorter or longer period of time would be necessary to meet the requirement of 10 to 15 pounds or 1/4 full bag (mentioned in Item #1 above).

Whenever you are using this vacuum cleaner for the removal of asbestos dust and dirt, or any other potentially toxic particulate matter, you should always follow the following suggestions:

1. Always use all of the filters provided and use them as directed in the instructions.
2. Always follow the instructions given in the care and maintenance of the unit.
3. Whenever using or cleaning the machine, wear the protective face mask provided.
4. Please keep in mind that "what you don't see can harm you." The ill effects of asbestos dust may not show up until 20 or 30 years after exposure.
5. Do not use this vacuum to clean up or remove liquids or slurries of any kind as serious electrical shock could occur.
6. Do not use this vacuum in an area that contains potentially explosive liquids, vapors or dust, i.e. gasoline, cleaning fluids, flour dust, etc.
7. This vacuum is to be used on 110 to 120V AC/DC only.
