

1 underneath the rug here or the floor or in the walls,
2 I have got to take a section and cut through here.
3 And we actually do that with a special kind of knife
4 and we cut like I took a chain saw and cut through the
5 floor here and held up the floorboards for you, what
6 would you see?

7 You would see the rug -- you would see the
8 room. You would see the rug and see the floorboards
9 underneath it, and you would see the space where the
10 pipes run and see the courtroom underneath. You see
11 the ceiling, and then you see the courtroom
12 underneath.

13 In fact, that is exactly the way we are
14 going to look at this.

15 So I am going to take right down through
16 here, and we are going to look at that cut surface;
17 and that is what I am showing you right here.

18 Here is the courtroom space we are sitting
19 in right now, and we have been looking down on the
20 surface. See right here, these cells have little
21 bumps all over them.
