

1 specifically?

2 A Yes. And it specifically talks about the
3 regulation for those types of asbestos. Chrysotile is
4 the only serpentine.

5 All of the others, crocidolite, amosite,
6 tremolite, anthophyllite, and actinolite are amphibole
7 asbestos.

8 Q Now, did OSHA make any recommendations or
9 any findings as to whether asbestos was a hazardous
10 material when it issued these OSHA regulations?

11 A Yes, it did. Its own risk assessment
12 clearly demonstrated risk among workers exposed.

13 Q I would like to show you which -- what is
14 page 22615 of the Federal Register, and did OSHA, OSHA
15 in this particular document, make an overview of the
16 health-related diseases and the asbestos-related
17 diseases that one could contract from exposure to
18 asbestos?

19 A This paragraph they talk about the fact
20 that, as we stated before, that asbestos is a
21 clearly -- is a toxic material and clearly has
