TCA Final Report

B.I. Halley - TCA

J. Nelson Katzenmeyer

B. Scott Zaidie

Zwick Scharp

Jahson Bowler

Strasburg Wilcox

US pop. not adj. for observed age distribution
at Louisville for large group

Did not use SMR in large Louis. group
because for large group did not trace
terminations for large group

MCA Study invalid to the extent that
there was not a precise definition
of the population. In Louisville we
included all plant workers - however, other
complexes included only VCM or PVC workers

Follow up of terminated res

1) airtel credit

2) Direct Mail

3) now going to use SS#

20233001

B.F. Goodrich

Angio - time dependent
Brain CA - exposure dependent
vascular lesions - inversely exposure dependent

June 10, 1974

TABERSHAW/COOPER ASSOCIATES
Visit - Friday, June 14, '74

Please be informed that Dr. Gaffey of TCA will meet with us
for an in-depth review of their recent B. F. Goodrich
Epidemiological Study in Conference Room 1-A at 8:30 A.M.

The guest diningroom has been reserved for 11:30 A.M. We
will plan to go through the line.

Attached

Xerox copies of the pertinent tables and TCA conclusions
will be available for everyone attending this meeting. These
will be distributed prior to the meeting for your perusal
beforehand.
