SUBJECT

Highly Refined Aroclor

REFERENCE

TO

J. R. SAVAGE - B2NB

The production people at WOK called last week to get an okay on a shipment of highly refined Aroclor to Hercules because the shipping time was up. We are still having difficulty resolving this problem. Anniston originally started shipping this material and with very little difficulty.

More recently DuPont returned one drum because of inferior quality. We are now shipping them in brown bottles because we cannot maintain the quality in drums.

Would you please look into this situation and see if it can be resolved. Thanks.

CS

Resistivity 20,000 spec spec

- 1 Munch said this shipment was 600,000*
- 2 Our lab said 10-12,000*

This we had 20,000 in our lab at WOK when it left

DSW 329247

Suggest that we buy special drums for these 20,000 - 6-8 drums
