Subject: Comments from The Chemours Company FC, LLC - Thermal and Specialized Solutions segment to the Expert Summary Reports

Dear Madam, dear Sir,

On behalf of The Chemours Company FC, LLC's Thermal and Specialized Solutions segment, we would like to thank you for the opportunity to submit information to the Call for Evidence launched on July 19, 2021. We value your continued collaboration and openness to input from varied stakeholders across the EU industrial value chain.

We hope our input provided in the questionnaire form helps provide clarity on the uses, socioeconomic contributions, and lack of viable alternatives to F-gases. For ease of reference, please find attached a copy of our questionnaire. This submission, and information provided, focuses on f-gases and this portion of Chemours' portfolio within the scope to better capture product-specific information. In parallel, a separate submission from the Chemours Advanced Performance Materials segment will be provided, focused on fluoropolymers.

We would also like to thank you for providing expert summary reports of the input that you have received to date. It was useful to have a clear understanding of the methodology and definitions used in these analyses. After carefully reviewing these reports, we would like to share some of our observations for your consideration.

Attached, please find a document in which we highlight parts of the summary reports where our data on the f-gas market differs from the relevant report. We hope for the opportunity to discuss these differences at an appropriate time, to ensure a shared complete and accurate understanding of the F-gas market in Europe.

Chemours supports a coherent regulatory framework that promotes safe and sustainable chemicals in the EU, and we are committed to supporting this regulatory process along those principles. We hope the information submitted is useful in this process. Please reach out to 5.1.2e if you have any further questions or require additional information.

We look forward to maintaining an open dialogue as this process continues.

Sincerely yours,

5.1.2e

Chemours International Operations Sarl
