December 19, 1941

Dr. Francis G. Frary
Aluminum Company of America
Aluminum Research Laboratories
Post Office Box 772
New Kensington, Pa.

248.898

Dear Dr. Frary:

Thank you very much for your letter of the 17th. I am relieved to know that it may be possible to get more of the activated C-730. We have enough on hand to carry us through another two or three weeks.

While I am very glad to know that you may be able to prepare us some of the precipitated hydrate containing chlorides, such as we made here at the laboratory, I believe we had better defer attempting to use it by inhalation until we have completed the present experiment as our space is somewhat limited. I would like to keep this matter in reserve, however and if we do not get the results which I anticipate with your product, it may be well to try it.

Sincerely yours,

Leroy U. Gardner, M.D.
Director
