SUBJECT Set-Up Batch (B-1963, R-9) ✓ File

The analyses requested of the subject set-up batch and the control batch (B-1962, R-7) showed the results listed in Table I. In addition, it was noted that gas chromatographic, as well as infrared, analyses showed activities which were not noted in the control sample (B-1962, R-7). Positive identification of the impurities observed could not be made to date. Identification will be pursued, however, and a report will be issued as soon as possible.
